Insulation & Air Tightness

# Our System

Potius™ panels use Engineered Timber Framing and Sheathing for high dimensional accuracy and strength. Our insulation is closed cell foam sprayed into each panel for air tightness, rigidity and fire resistance.

Potius™ Engineering  
In-house engineering and drafting services mean we can help with all your building requirements including:

- Custom Panel Design
- Foundations
- Structure
- Decks
- Retaining Walls
- Modelling and Shop Drawings

150 Housing New Zealand units in CHCH – Architecture by Design Base

## Multi Unit Systems

Potius Building Systems are perfect for Multi Unit designs incorporating features such as

- Acoustic Panels
- Intertenancy walls
- Subfloor/Midfloors
- Mono pitch roofs, vaulted ceilings

## Naturally Environmental Friendly Product

Manufactured in Nelson, minimising shipping distances compared to imported products, and made from New Zealand Grown, sustainable wood
